Technology Evolution in Disruptive Steps

How to on-board your enterprise into the cloud

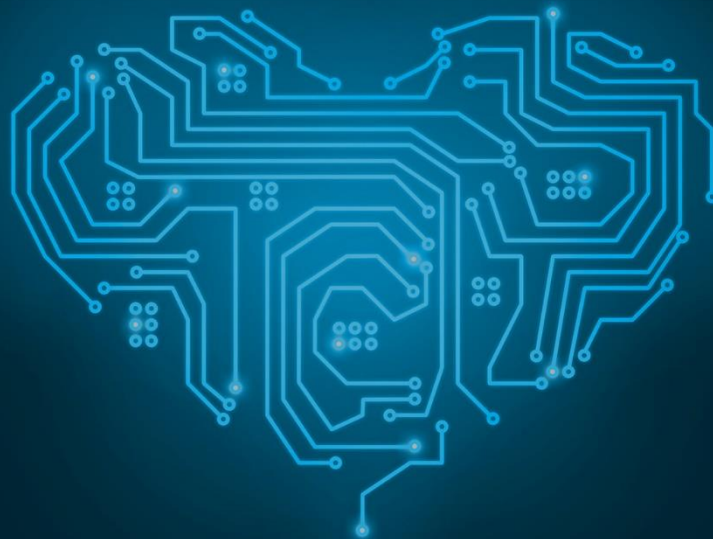

REPLICATE

Shifting responsibility

RETROFIT

Going global with the cloud

TOMTEC ZERO SAFE SWISS CLOUD

SAFE SWISS CLOUD & TOMTEC ZERO

- Based on the Safe Swiss Cloud TOMTEC provides automated image analytics of volume and function of the beating heart
- First time Cardiologists will have access to diagnostic tools anytime, anywhere
- Safe Swiss Cloud provides reliable and secure infrastructure for critical medical services

Normal
heart

TRACKING NON VISUAL CHANGES IN HEART FUNCTION

- A MEDICAL SCENARIO -

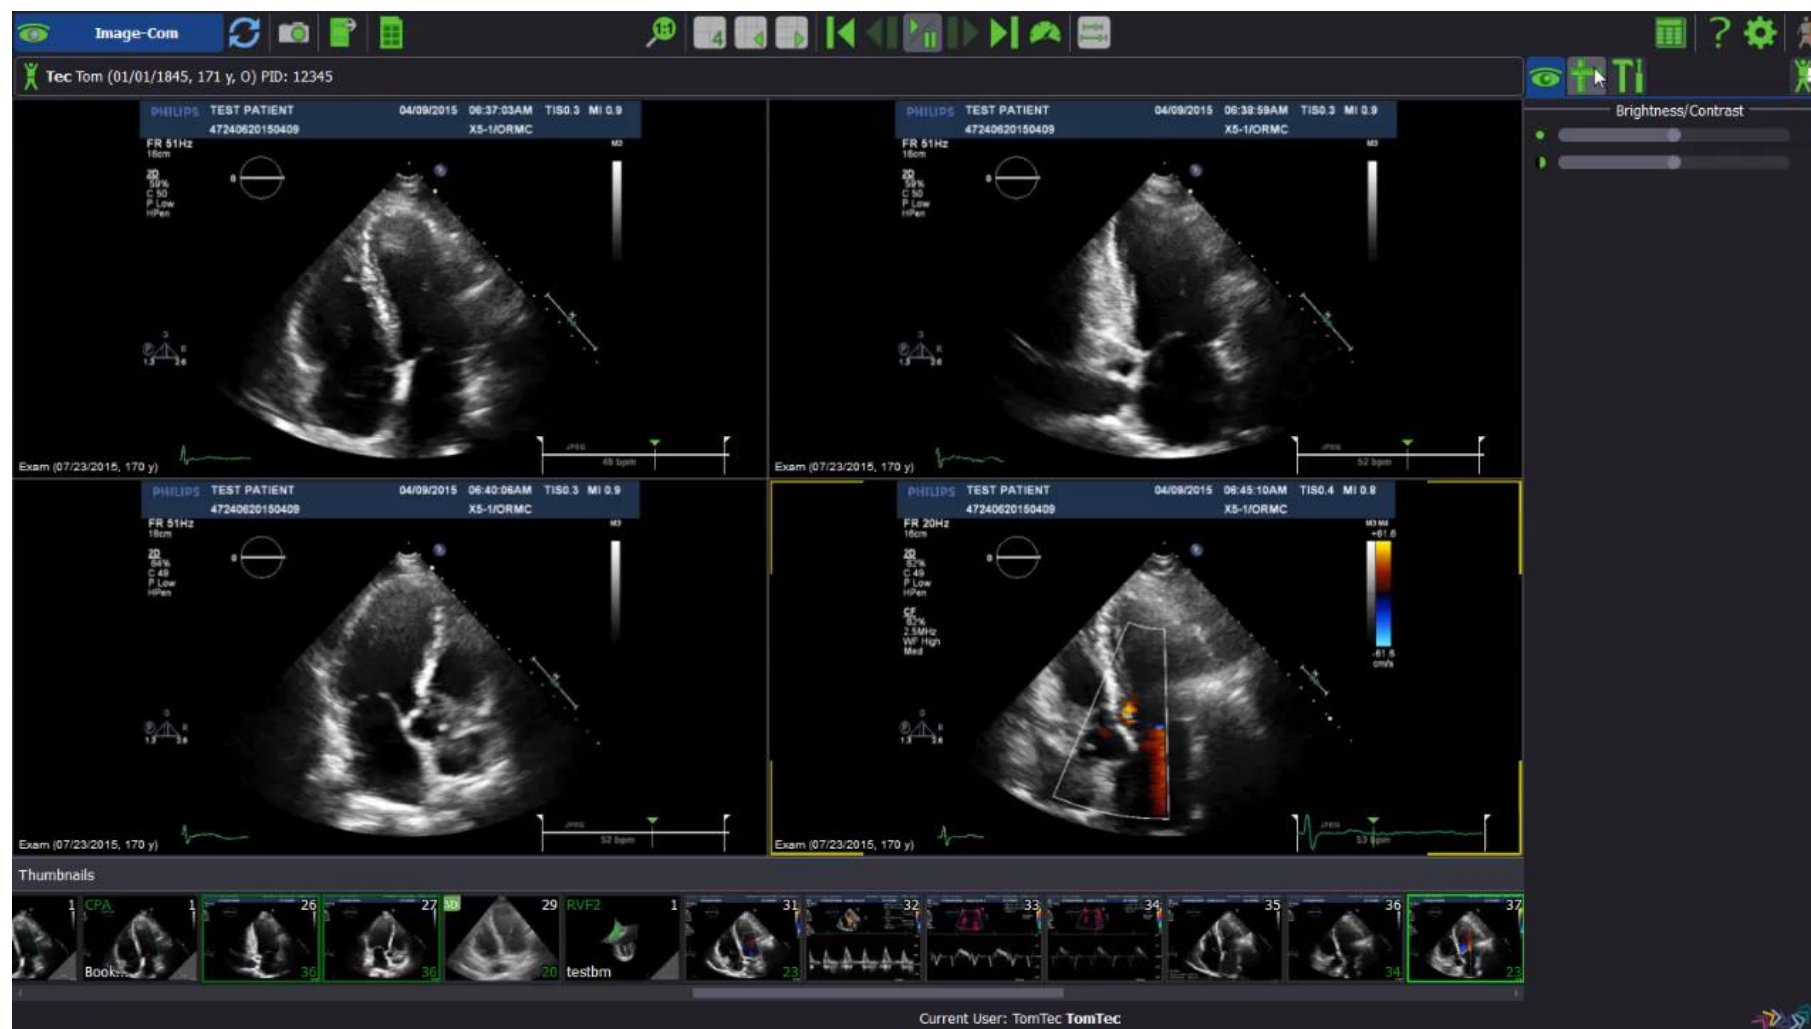

Medical Use Case

- A healthy heart follows different movement patterns than a pathologic heart
- For diagnosis, the beating heart needs to get visualized and measured in volume and function
- As of today most Cardiologists do this manually
- As a result, each diagnosis is dependent on the skill-level and the tools of each doctor

Solution: Automation

- TOMTEC provides automated heart muscle tracking technology
- The software even tracks changes in the heart that can not be detected by the human eye
- Automation eliminates user variability, thus improves diagnostic quality and at the same time efficiency

TOMTEC ZERO

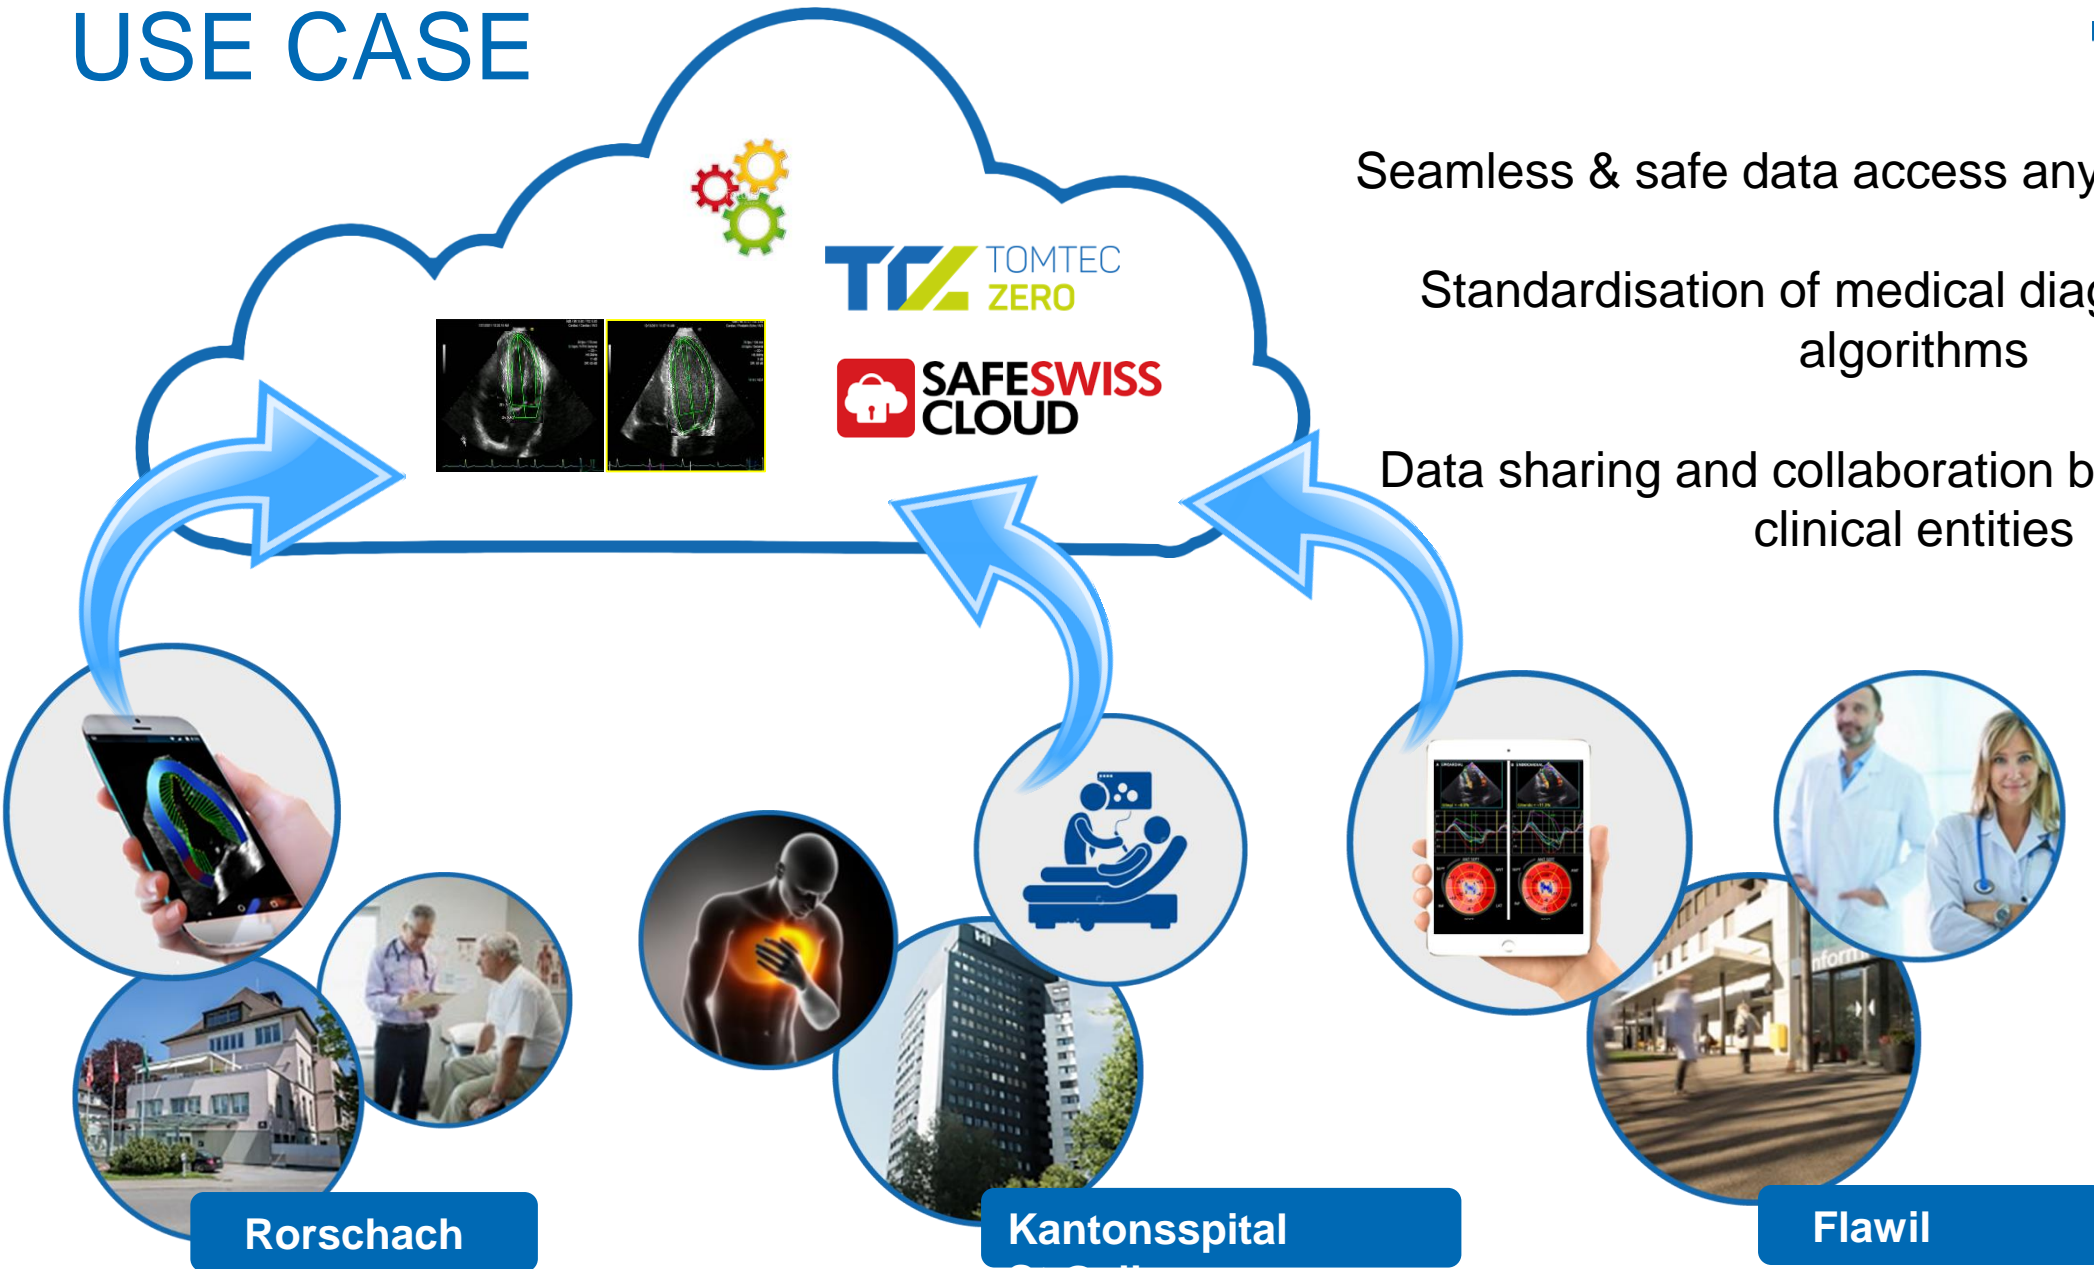

USE CASE

TR TOMTEC

Seamless & safe data access anytime & anywhere

Standardisation of medical diagnostic tools & algorithms

Data sharing and collaboration between different clinical entities

REINVENT

Born in the cloud | DevOps

Innovation is born in the cloud

Rapid Time to Market

« I deployed my application in five minutes. »

Simplicity

« No more time spent on low-level infrastructure. »

Fractional IT Consumption

« I use and pay just what I
Need only when I need it. »

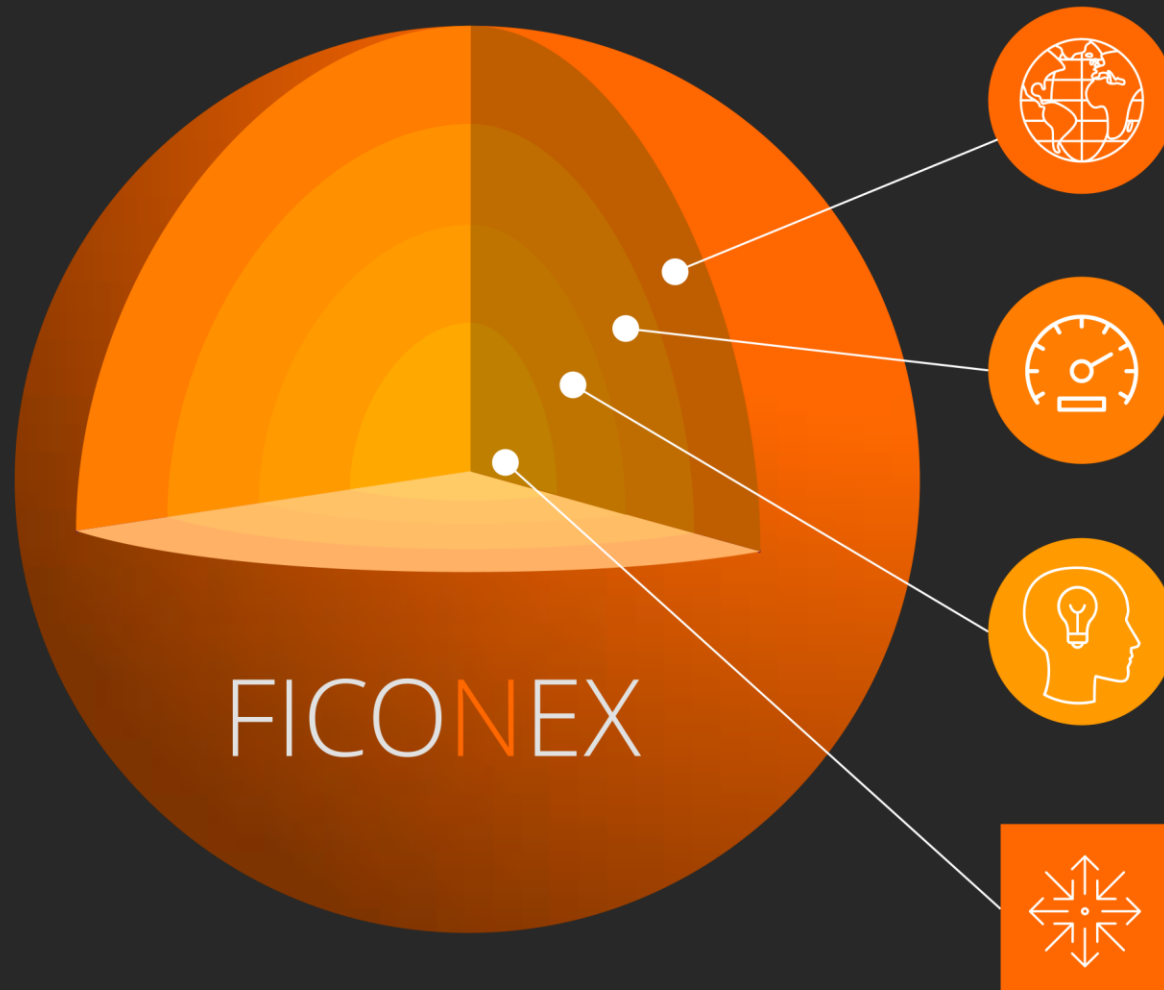

Continuous Innovation

« New capabilities are available
on a regular basis. »

Use Case FICONEX: Community driven Contribution in the Cloud

Global Contribution

Contribution Connectivity for all data formats, streaming real-time and static. Granular Entitlement for selective distribution of data portions to different counterparties. Control of Data ownership. Excel Add-In.

Outsourced Cloud Hosting and Support

Dedicated Cloud services with first second and third level support. Monitoring by dedicated team. World wide Cloud Locations.

Added Value Services

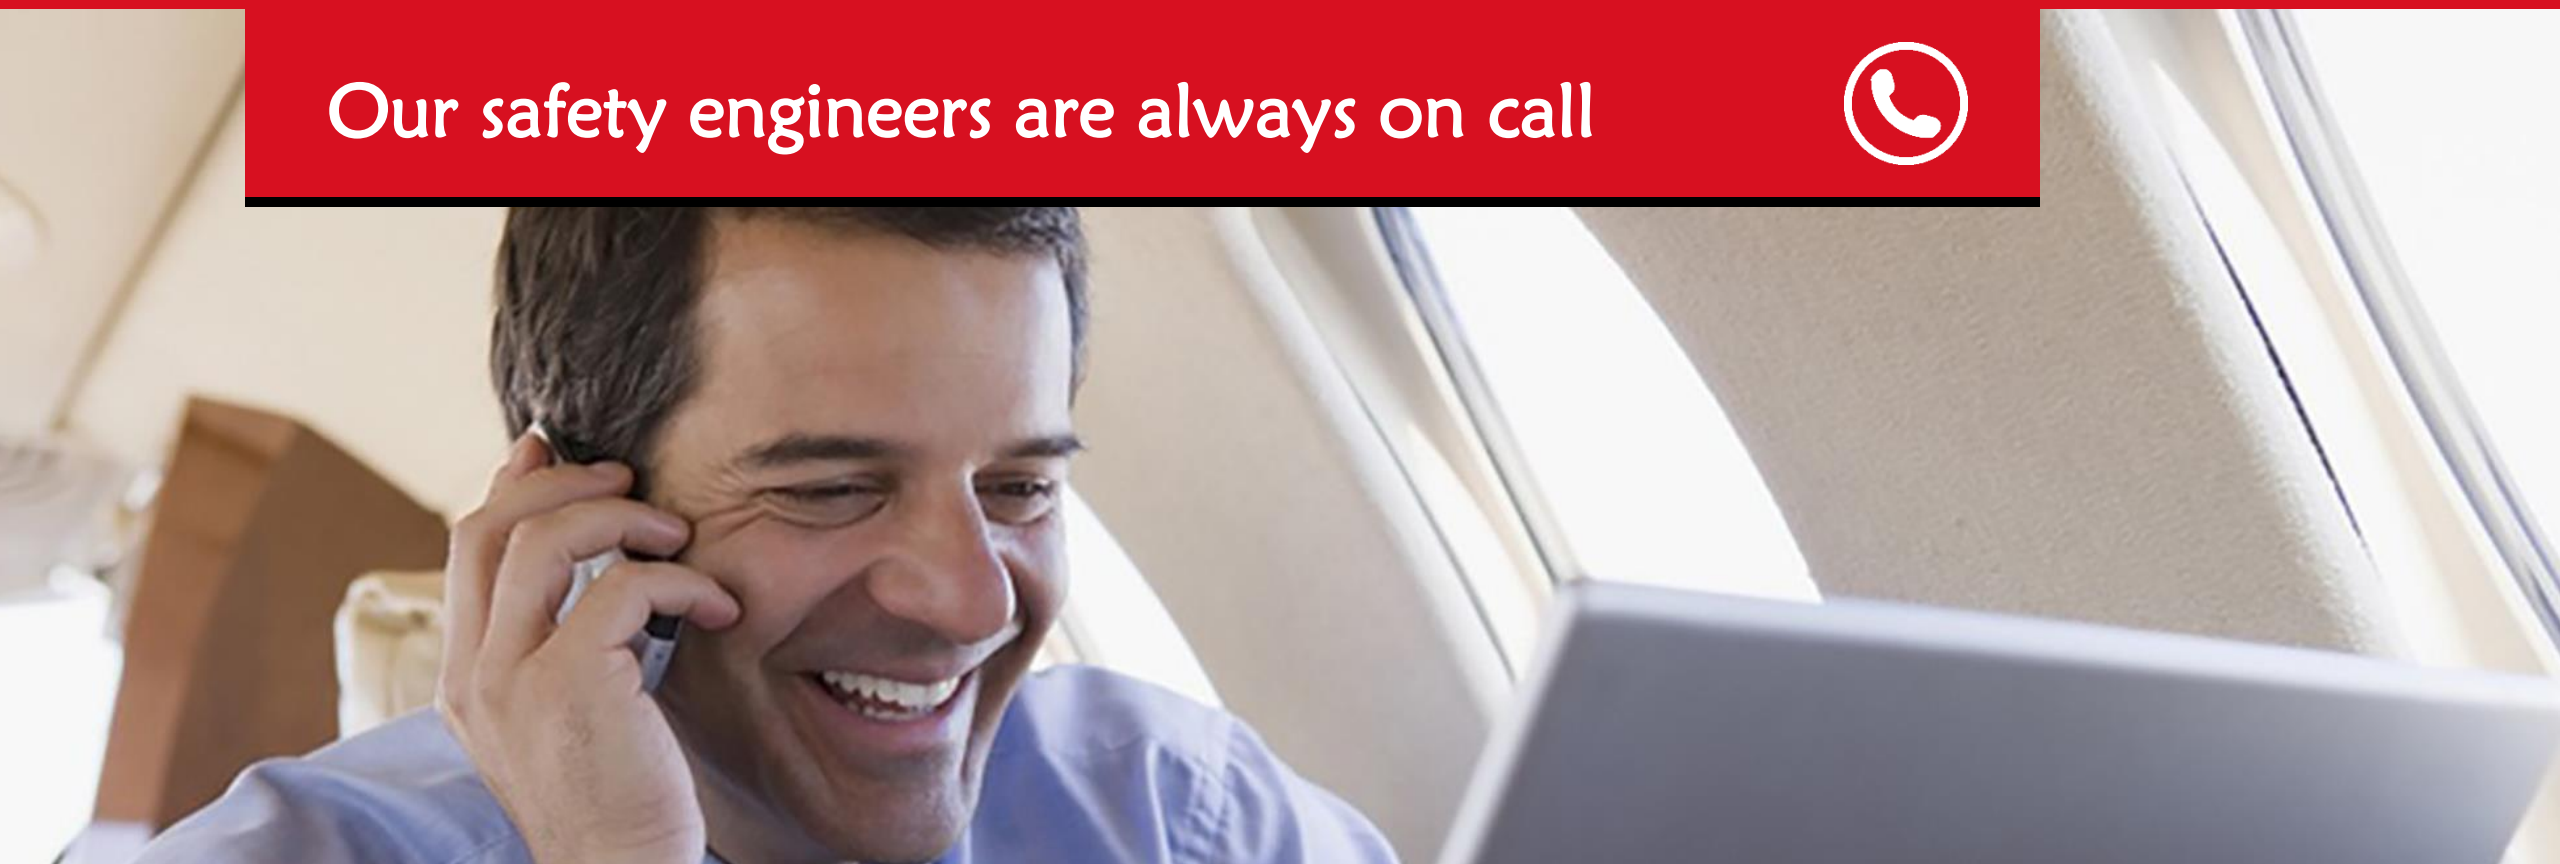

Data transformation, cleansing, calculation, Big Data Analytics, Collaboration (e.g. Chat, Excel value Sharing), anonymous indexing and statistics. Customer specific developments.

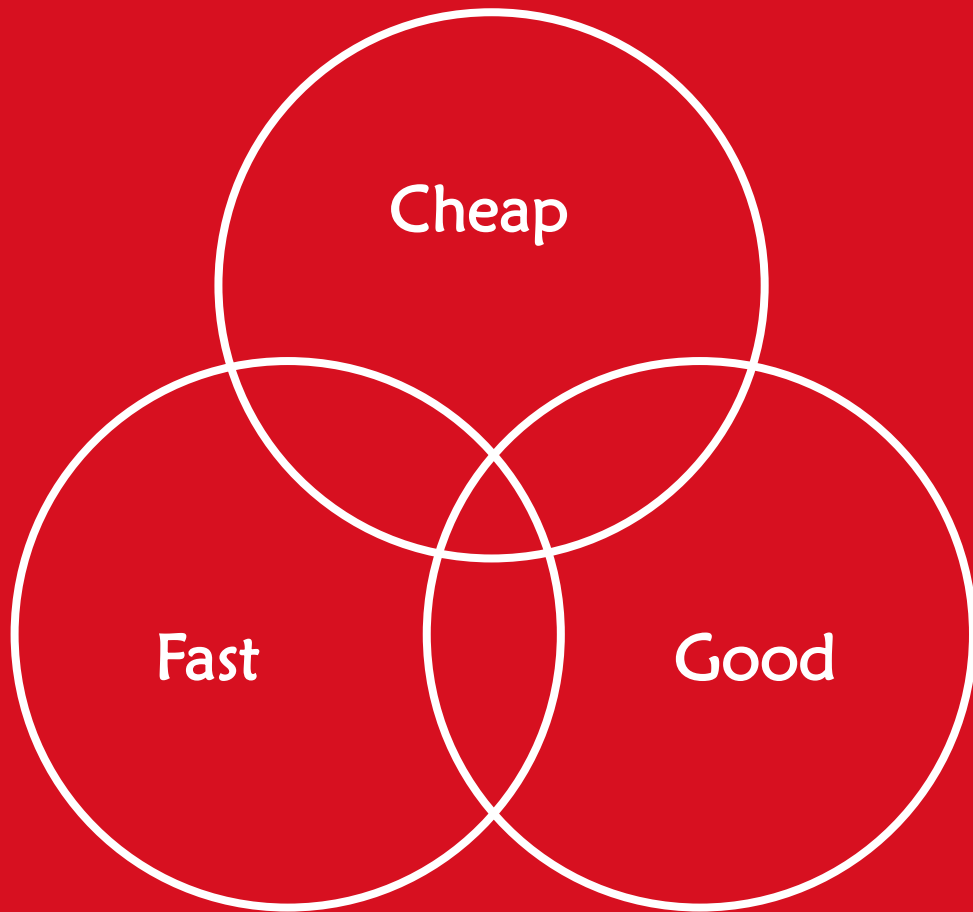

FICONEX based on the ONE Platform

Data exchange as a service for the whole industry with customer specific entitlement and selective distribution capabilities. Customer controlled. Tier 1 Banks proven technology.

SAFE SWISS CLOUD IS AN ENTERPRISE INFRASTRUCTURE AND SERVICES COMPANY
